

Exam : IBM 000-005

**Title : IBM Maximo Asset Management
V7.1 Solution Design**

Version : DEMO

<http://www.test4actual.com>

1. Which statement defines a maximo asset in IBM Maximo Asset Management V7.1(MAM)

- A. A Maximo Asset is a record in MAM used to identify equipment.
- B. A Maximo Asset is a record in MAM used to identify company assets.
- C. A Maximo Asset is any entity described in MAM to capture events and costs
- D. A Maximo Asset is any physical entity described in MAM to capture events and costs

Answer: B

2. One or more solutions for each functional gap now have been identified where the solution requires one

to vary from using standard IBM Maximo Asset Management V7.1. Which two factors are used to calculate the impact of each solution for the project success?(Choose two)

- A. length
- B. urgency
- C. Priority
- D. Risk to business
- E. difficulty to implement

Answer: DE

3. What is the life cycle for a Migration Manager Package?

- A. define, Create, Distribute, and Deploy.
- B. create, Define, Distribute, and Deploy.
- C. Create, Approve, Activate, and Distribute
- D. Design, Approve, Populate, and Distribute.

Answer: A

4. At a high level, around which three data levels are IBM Maximo Asset Management V7.1 functionality and security built?(Choose three)

- A. site
- B. system
- C. assets
- D. Locations
- E. Work Order
- F. Organization

Answer: ABF

5. If a customer has a requirements list, when is the best time to review this list with the customer and classify the requirements?

- A. at the end of the design phase
- B. as the first task of Design phase
- C. during the process design workshops
- D. at the beginning of the configuration phase

Answer: B

6. A customer wants to produce bar code labels for Assets containing specification data, Which type of requirement will this be considered as?

- A. configuration
- B. custom report

C. customization

D. class file extension

Answer: B

7. The client requirements outline the need for advanced Asset lifecycle features to estimate compatible units or replacement assets, This requirement and other crew management related requirements are determined to exceed standard IBM Maximo Asset Management capabilities. Which industry solution or add-on provide this and other features?

A. Maximo Linear Assets

B. Maximo for Utilities

C. Maximo for Life Sciences

D. Maximo service Management

Answer: B

8. The client requirements outline the need for advanced tracking of process measurements such as temperature, pressure, and flow. These measurement and test equipment requirements are determined to exceed standard IBM Maximo Asset Management capabilities. Which industry solution or add-on will provide this and other features?

A. Maximo Calibration

B. Maximo for service Providers

C. Maximo linear asset

D. Maximo Instruments and controls

Answer: A

9. Which two methods are available to migrate data from a legacy system to IBM maximo Asset management V7.1(MaM)(choose two)?

A. use a data mapping tool to link the legacy database to the MAM data warehouse and update the MAM data.

B. Extract data from the legacy system and create SQL statements to insert the data directly into the MAM database.

C. connect the legacy database to the MAM database and synchronize the required data by using an external data mapping tool.

D. Extract data from the legacy system to comma-separated value files and use the data import option of the Integration framework

E. restore the legacy database on the MAM database server, connect MAM to the legacy database, and reorganize the tables, view, and fields.

Answer: BD

10. The customer's legacy system has no functionality to create custom integrations. Which two options are available to migrate data from a legacy system to an IBM Maximo asset management V7.1(MAM) environment?(Choose two)

A. Export data from the legacy system and import data as a database dump.

B. Directly insert extracted data from the legacy system into the MAM database by using SQL statements.

C. Extract data from the legacy system into flat files and use the Maximo Migration Manager to migrate the data into MAM.

D. use the data migration option in the maximo Integration Adapter, after having extracted data from the legacy system into the comma-separated value(CSV)files.

E. Use the data import option in the Integration Framework after having extracted f

Answer: BE
