

Exam : IBM 000-016

**Title : IBM Tivoli Asset Management for
IT V7.1 Implementation**

Update : Demo

1.What is a Location that contains inventory items, has a GL Account Code assigned to it, and provides a read-only list of inventory items at that Location?

- A.a Site
- B.a Storeroom
- C.a Courier Location
- D.a Holding Location

Correct:B

2.A given discovery tool does not provide or maintain information on Sites. How can this information be provided for an IBM Tivoli Asset Management for IT V7.1 (TAMIT) implementation?

- A.use the Task Filters application
- B.use the Deployed Assets application
- C.set the values using an expression in a mapping
- D.run the TAMIT Site application to align the Deployed Assets to a Site

Correct:C

3.A Rotating Item is being received and held in a holding Location. It is not serialized. What is the status of the receipt line item?

- A.WINSP
- B.WASSET
- C.WRECPT
- D.WRASSET

Correct:B

4.Which application is used to establish standard naming conventions for computer software applications?

- A.Link Rules
- B.Comparison Rules
- C.Software Conversion
- D.Deployed Asset Conversion

Correct:C

5.Which capabilities are facilitated by associating Commodities with a contract?

- A.managing Commodity Codes
- B.managing Commodity Groups
- C.searching for Locations by Contract
- D.searching for Commodities by Contract

Correct:D

6.What must be specified before changing a contract's status to Approved (APPR)?

- A.at least one site authorized
- B.contract start date and vendor terms
- C.contract start and end dates and a vendor
- D.the contract associated to at least one vendor

Correct:A

7.As part of Work Order functionality, which action is used to modify Asset, Location, and Configuration Item Specifications?

- A.on a Work Order, use the Move/Swap/Modify action
- B.on a Work Order, use the Specify/Modify Classification action

-
- C.on a Work Order result list, use the Move/Swap/Modify/ action
D.on a Work Order result list, use the Specify/Modify Classification action

Correct:A

8.Where can a comment be made that explains why an Authorized Asset does not link to a Deployed Asset?

- A.Asset Link Results
- B.Integration Framework
- C.Asset Reconciliation Results
- D.IBM Tivoli Integration Composer

Correct:C

9.When creating an Item within the Item Master application, what are two mandatory fields? (Choose two.)

- A.Item
- B.Lot Type
- C.Order Unit
- D.Description
- E.Commodity Group

Correct:A B

10.Which field is required when creating a Person Group?

- A.User
- B.Group
- C.Person
- D.Person Group

Correct:D

11.In the Inventory application, how should modifications to the current balance of an Item in a Storeroom be made?

- A.select Inventory Adjustments -> reconcile balance from the Select Action menu
- B.select Inventory Adjustments -> select Current Balance from the Select Action menu
- C.select Unit of Measure and Conversion -> add Modify Conversions from the Select Action menu
- D.select Unit of Measure and Conversion -> add Modify Units of Measure from the Select Action menu

Correct:B

12.At which level are Storeroom Records managed?

- A.Site
- B.System
- C.Location
- D.Organization

Correct:A

13.An Action can be triggered during which two events? (Choose two.)

- A.escalation point
- B.Exception Group
- C.Workflow control
- D.Workflow process
- E.ticket management process

Correct:A D

14.Which status must the Work Order have to facilitate Flow Control Use?

- A.APPR
- B.INPRG
- C.READY
- D.INITIATE

Correct:B

15.What can Item Assembly Structures be used as templates for?

- A.for building multiple Item Masters
- B.for building multiple Storeroom Locations
- C.for building multiple Commodity Groups and Commodity Codes
- D.for building multiple Asset Assembly Structures and their related Location systems

Correct:D

16.At which database level are Tax Options set?

- A.Set
- B.Site
- C.System
- D.Organization

Correct:D

17.At which level can Service Items be set?

- A.Site
- B.System
- C.Item Set
- D.Organization

Correct:C

18.If a maximo.properties file exists and contains the same property name but at a different Value than the database is aware of, what will be the result when the application server is started?

- A.The lower value defined in either the maximo.properties file or the database will be the active value.
- B.The higher value defined in either the maximo.properties file or the database will be the active value.
- C.The value maintained in the maximo.properties file will be overridden by the settings in the database.
- D.The value maintained in the database will be overridden by the settings in the maximo.properties file.

Correct:D

19.Which application is used to view data collected from a Discovery Tool?

- A.Nodes
- B.Assets
- C.Computers
- D.Item Master

Correct:C

20.Which log level must log4j.logger.maximo.sql be set to so SQL statements are printed in the log?

- A.INFO
- B.ERROR
- C.DEBUG
- D.SQLDEBUG

Correct:A
